Skin contact	Take off contaminated clothing and shoes immediately. Wash off with plenty of soap and water for at least 15 minutes and consult a physician if feel uncomfortable.
Ingestion	Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.

<b>Inhalation</b>	Move victim into fresh air. If breathing is difficult, give oxygen. Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance. If not breathing, give artificial respiration and consult a physician immediately.
<b>Protecting of first-aiders</b>	Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination.

### Most important symptoms/effects, acute and delayed

1 Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure.

### Indication of any immediate medical attention and special treatment needed

1 Treat symptomatically.  
2 Symptoms may be delayed.

## 5 Fire-fighting measures

### Extinguishing media

### Specific hazards arising from the substance or mixture

1 Development of hazardous combustion gases or vapor possible in the event of fire.  
2 May expand or decompose explosively when heated or involved in fire.

### Special protective equipment and precautions for fire-fighters

1 As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.  
2 Fight fire from a safe distance, with adequate cover.  
3 Prevent fire extinguishing water from contaminating surface water or the ground water system.

## 6 Accidental release measures

### Personal precautions, protective equipment and emergency procedures

1 Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.  
2 Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.  
3 Use personal protective equipment, do not breathe dust/fume.

### Environmental precautions

1 Prevent further leakage or spillage if safe to do so.  
2 Discharge into the environment must be avoided.

### Methods and materials for containment and cleaning up

1 Cut off the source of the leak as much as possible.  
2 Keep leaks in a ventilated place.  
3 Isolation of contaminated areas and restrictions on access.  
4 It is recommended that emergency personnel wear dust masks.  
5 Collect the spill with a clean shovel and place it in a clean, dry, loosely closed container and move the container away from the leak.

6	Adhered or collected material should be promptly disposed of, in accordance with appropriate laws and regulations.
