## 4 First-aid measures

### Description of first aid measures

-	
General advice	Immediate medical attention is required. Show this safety data sheet (SDS) to the
	doctor in attendance.
Eye contact	Rinse thoroughly with plenty of water for at least 15 minutes and consult a
Eye contact	
	physician if feel uncomfortable.
Skin contact	Take off contaminated clothing and shoes immediately. Wash off with plenty of
	soap and water for at least 15 minutes and consult a physician if feel
	, ,
	uncomfortable.
Ingestion	Never give anything by mouth to an unconscious person. Call a physician or
	Poison Control Center immediately.
Inhalation	Move victim into fresh air. If breathing is difficult, give oxygen. Do not use mouth
	to mouth resuscitation if victim ingested or inhaled the substance. If not breathing,
	give artificial respiration and consult a physician immediately.
Protecting of first-aiders	Ensure that medical personnel are aware of the substance involved. Take
	precautions to protect themselves and prevent spread of contamination.

### Most important symptoms/effects, acute and delayed

1 Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure.

### Indication of any immediate medical attention and special treatment needed

- 1 Treat symptomatically.
- 2 Symptoms may be delayed.
- Fire-fighting measures

### Extinguishing media

Suitable extinguishing media	Small fire: dry chemical, CO <sub>2</sub> or water spray; Large fire: water spray, fog or		
	regular foam; Fire involving tanks, rail tank cars or highway tanks: Fight fire from		
maximum distance or use unmanned master stream devices or mor			
	Cool containers with flooding quantities of water until well after fire is out. Do not		
	get water inside containers.		
Unsuitable extinguishing media	Large fire: avoid aiming straight or solid streams directly onto the product.		

### Specific hazards arising from the substance or mixture

- 1 May emit poisonous fumes on fire.
- 2 Development of hazardous combustion gases or vapor possible in the event of fire.
- 3 May expansion or decompose explosively when heated or involved in fire.

### Special protective equipment and precautions for fire-fighters

As in any fire, wear self-contained breathing apparatus (MSHA/NIOSH approved or equivalent) and full protective gear.

Version: V2.0.0.1 Revision Date: 2025/12/08

- 2 Fight fire from a safe distance, with adequate cover.
- 3 Prevent fire extinguishing water from contaminating surface water or the ground water system.

### 6 Accidental release measures

### Personal precautions, protective equipment and emergency procedures

- 1 Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire.
- 2 Do not touch or walk through spilled material.
- 3 Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
- 4 Use personal protective equipment, do not breathe gas/mist/vapour/spray.
- Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.
- 6 Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

### **Environmental precautions**

- 1 Prevent further leakage or spillage if safe to do so.
- 2 Discharge into the environment must be avoided.

### Methods and materials for containment and cleaning up

- 1 Do not touch or cross spills.
- 2 Cover with anti-solvent foam to reduce evaporation.
- It is recommended that emergency personnel wear positive pressure self-contained breathing apparatus and wear anti-virus suits.
- 4 Spray water disperses the vapor and dilutes the liquid spill.
- 5 Do not touch broken containers and spills before putting on appropriate protective clothing.
- 6 Cut off the source of the leak as much as possible.
- 7 Keep leaks in a ventilated place.
- Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding.
- 9 Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.
- Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.

## 7 Handling and storage

### Precautions for safe handling

- 1 Handling is performed in a well ventilated place.
- 2 Wear suitable protective equipment.
- 3 Avoid contact with skin and eyes.
- 4 Keep away from heat/sparks/open flames/ hot surfaces.

### Conditions for safe storage, including any incompatibilities

- 1 Keep containers tightly closed.
- 2 Keep containers in a dry, cool and well-ventilated place.
- 3 Keep away from heat/sparks/open flames/hot surfaces.
