

## Safety Data Sheet

# Ammonium mercuric thiocyanate test solutio

Version : V2.0.0.1

Report No. : BWZ8459-2016-MSDS-US

Creation Date : 2025/09/30

Revision Date : -

\*Prepared according to American OSHA HCS-2024 (29 CFR 1910.1200)

## 1 Identification

### Product identifier

|                   |                                            |
|-------------------|--------------------------------------------|
| Product Name      | Ammonium mercuric thiocyanate test solutio |
| Cat No.           | BWZ8459-2016                               |
| CAS No.           | 1762-95-4                                  |
| EC No.            | 217-175-6                                  |
| Molecular Formula | NH4SCN                                     |

### Recommended use of the product and restrictions on use

|                          |                              |
|--------------------------|------------------------------|
| Relevant identified uses | Please consult manufacturer. |
| Uses advised against     | Please consult manufacturer. |

### Details of the supplier of the Safety Data Sheet

|                        |                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------|
| Name of the company    | Weiyel Inc                                                                                           |
| Address of the company | Hedian Light Industrial Park, Chengguan Town, Shangcheng County, Xinyang City, Henan Province, China |
| Post code              | 465350                                                                                               |
| Telephone number       | 010-58103678                                                                                         |
| Fax number             | 010-84840368                                                                                         |
| E-mail address         | info@weiyel.com                                                                                      |

### Emergency phone number

|                        |              |
|------------------------|--------------|
| Emergency phone number | 010-58103678 |
|------------------------|--------------|

## 2 Hazard(s) identification

### Hazard classification according to 29 CFR 1910.1200

|                                                    |            |
|----------------------------------------------------|------------|
| Acute Toxicity - Oral                              | Category 2 |
| Acute Toxicity - Dermal                            | Category 3 |
| Skin Corrosion/Irritation                          | Category 2 |
| Serious eye damage/irritation                      | Category 1 |
| Germ cell mutagenicity                             | Category 2 |
| Reproductive toxicity                              | Category 2 |
| Specific target organ toxicity - repeated exposure | Category 1 |

### Label elements

|                   |                                                                                    |
|-------------------|------------------------------------------------------------------------------------|
| Hazard pictograms |  |
| Signal word       | <b>Danger</b>                                                                      |

### Hazard statements

|      |                                                                         |
|------|-------------------------------------------------------------------------|
| H300 | Fatal if swallowed                                                      |
| H311 | Toxic in contact with skin                                              |
| H315 | Causes skin irritation                                                  |
| H318 | Causes serious eye damage                                               |
| H341 | Suspected of causing genetic defects                                    |
| H361 | Suspected of damaging fertility                                         |
| H372 | Causes damage to organs through prolonged or repeated exposure(thyroid) |

### Precautionary statements

#### ◆ Prevention

|      |                                                                                               |
|------|-----------------------------------------------------------------------------------------------|
| P201 | Obtain special instructions before use.                                                       |
| P202 | Do not handle until all safety precautions have been read and understood.                     |
| P260 | Do not breathe gas/mist/vapour/spray.                                                         |
| P264 | Wash hands and other parts of the body (if related) thoroughly after handling.                |
| P270 | Do not eat, drink or smoke when using this product.                                           |
| P280 | Wear protective gloves/protective clothing/eye protection/face protection/hearing protection. |

#### ◆ Response

|                |                                                                                                                                  |
|----------------|----------------------------------------------------------------------------------------------------------------------------------|
| P321           | Specific treatment (see related instructions on the label).                                                                      |
| P330           | Rinse mouth.                                                                                                                     |
| P302+P352      | IF ON SKIN: Wash with plenty of water.                                                                                           |
| P361+P364      | Take off immediately all contaminated clothing and wash it before reuse.                                                         |
| P305+P351+P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |

#### ◆ Storage

|      |                  |
|------|------------------|
| P405 | Store locked up. |
|------|------------------|

#### ◆ Disposal

|      |                                                                                                     |
|------|-----------------------------------------------------------------------------------------------------|
| P501 | Dispose of contents/container in accordance with local/regional/national/international regulations. |
|------|-----------------------------------------------------------------------------------------------------|

### Other hazards

|  |                 |
|--|-----------------|
|  | Not applicable. |
|--|-----------------|

### Hazard description

#### ◆ Physical and chemical hazards

|  |                          |
|--|--------------------------|
|  | No information available |
|--|--------------------------|

#### ◆ Health hazards

|         |                                                                                                                           |
|---------|---------------------------------------------------------------------------------------------------------------------------|
| Inhaled | Inhalation of the product may produce adverse health effects or irritation of the respiratory tract following discomfort. |
|---------|---------------------------------------------------------------------------------------------------------------------------|

|                     |                                                                                                                                                             |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Ingestion</b>    | Severely toxic effects may result from the accidental ingestion of the product.                                                                             |
| <b>Skin Contact</b> | The product can cause skin irritation following direct contact with the skin. Toxic in contact with skin, systemic effects may result following absorption. |
| <b>Eye</b>          | The product can produce severe chemical burns to the eye following direct contact.                                                                          |

◆ Environmental hazards

|  |                                      |
|--|--------------------------------------|
|  | Please refer to 12th chapter of SDS. |
|--|--------------------------------------|

### 3 Composition/information on ingredients

#### | Substance/mixture

|  |           |
|--|-----------|
|  | Substance |
|--|-----------|

| Component                   | CAS No.   | EC No.    | Concentration (wt, %) |
|-----------------------------|-----------|-----------|-----------------------|
| <b>Ammonium thiocyanate</b> | 1762-95-4 | 217-175-6 | 5.0                   |
| <b>Mercury dichloride</b>   | 7487-94-7 | 231-299-8 | 4.5                   |
| <b>Water</b>                | 7732-18-5 | 231-791-2 | 90.5                  |

### 4 First-aid measures

#### | Description of first aid measures

|                                   |                                                                                                                                                                                                                                             |
|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General advice</b>             | Immediate medical attention is required. Show this safety data sheet (SDS) to the doctor in attendance.                                                                                                                                     |
| <b>Eye contact</b>                | Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician if feel uncomfortable.                                                                                                                                |
| <b>Skin contact</b>               | Take off contaminated clothing and shoes immediately. Wash off with plenty of soap and water for at least 15 minutes and consult a physician if feel uncomfortable.                                                                         |
| <b>Ingestion</b>                  | Never give anything by mouth to an unconscious person. Call a physician or Poison Control Center immediately.                                                                                                                               |
| <b>Inhalation</b>                 | Move victim into fresh air. If breathing is difficult, give oxygen. Do not use mouth to mouth resuscitation if victim ingested or inhaled the substance. If not breathing, give artificial respiration and consult a physician immediately. |
| <b>Protecting of first-aiders</b> | Ensure that medical personnel are aware of the substance involved. Take precautions to protect themselves and prevent spread of contamination.                                                                                              |

#### | Most important symptoms/effects, acute and delayed

|   |                                                                                                                                        |
|---|----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Substance accumulation, in the human body, may occur and may cause some concern following repeated or long-term occupational exposure. |
|---|----------------------------------------------------------------------------------------------------------------------------------------|

#### | Indication of any immediate medical attention and special treatment needed

|   |                          |
|---|--------------------------|
| 1 | Treat symptomatically.   |
| 2 | Symptoms may be delayed. |

### 5 Fire-fighting measures

#### | Extinguishing media

|                                     |                                                                                                                                                                                                                                                             |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable extinguishing media</b> | Small fire: dry chemical, CO <sub>2</sub> or water spray; Large fire: dry chemical, CO <sub>2</sub> , alcohol-resistant foam or water spray; Fire involving tanks, rail tank cars or highway tanks: Fight fire from maximum distance or use unmanned master |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                                       |                                                                                                                                                        |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                       | stream devices or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. Do not get water inside containers. |
| <b>Unsuitable extinguishing media</b> | No information available.                                                                                                                              |

### | Specific hazards arising from the substance or mixture

|   |                                                                                   |
|---|-----------------------------------------------------------------------------------|
| 1 | May emit poisonous fumes on fire.                                                 |
| 2 | Development of hazardous combustion gases or vapor possible in the event of fire. |
| 3 | May expansion or decompose explosively when heated or involved in fire.           |

### | Special protective equipment and precautions for fire-fighters

|   |                                                                                                                        |
|---|------------------------------------------------------------------------------------------------------------------------|
| 1 | As in any fire, wear self-contained breathing apparatus ( MSHA/NIOSH approved or equivalent) and full protective gear. |
| 2 | Fight fire from a safe distance, with adequate cover.                                                                  |
| 3 | Prevent fire extinguishing water from contaminating surface water or the ground water system.                          |

## 6 Accidental release measures

### | Personal precautions, protective equipment and emergency procedures

|   |                                                                                                                     |
|---|---------------------------------------------------------------------------------------------------------------------|
| 1 | Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire.                    |
| 2 | Do not touch or walk through spilled material.                                                                      |
| 3 | Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.                 |
| 4 | Use personal protective equipment, do not breathe gas/mist/vapour/spray.                                            |
| 5 | Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges. |
| 6 | Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.                                   |

### | Environmental precautions

|   |                                                       |
|---|-------------------------------------------------------|
| 1 | Prevent further leakage or spillage if safe to do so. |
| 2 | Discharge into the environment must be avoided.       |

### | Methods and materials for containment and cleaning up

|    |                                                                                                                                 |
|----|---------------------------------------------------------------------------------------------------------------------------------|
| 1  | Do not touch or cross spills.                                                                                                   |
| 2  | Cover with anti-solvent foam to reduce evaporation.                                                                             |
| 3  | It is recommended that emergency personnel wear positive pressure self-contained breathing apparatus and wear anti-virus suits. |
| 4  | Spray water disperses the vapor and dilutes the liquid spill.                                                                   |
| 5  | Do not touch broken containers and spills before putting on appropriate protective clothing.                                    |
| 6  | Cut off the source of the leak as much as possible.                                                                             |
| 7  | Keep leaks in a ventilated place.                                                                                               |
| 8  | Absorb spilled material in dry sand or inert absorbent. In case of large amount of spillage, contain a spill by bunding.        |
| 9  | Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.                                            |
| 10 | Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and place in container.     |

## 7 Handling and storage

### | Precautions for safe handling

|   |                                                   |
|---|---------------------------------------------------|
| 1 | Handling is performed in a well ventilated place. |
|---|---------------------------------------------------|

|   |                                                       |
|---|-------------------------------------------------------|
| 2 | Wear suitable protective equipment.                   |
| 3 | Avoid contact with skin and eyes.                     |
| 4 | Keep away from heat/sparks/open flames/ hot surfaces. |

### Conditions for safe storage, including any incompatibilities

|   |                                                           |
|---|-----------------------------------------------------------|
| 1 | Keep containers tightly closed.                           |
| 2 | Keep containers in a dry, cool and well-ventilated place. |
| 3 | Keep away from heat/sparks/open flames/hot surfaces.      |

## 8 Exposure controls/personal protection

### Control parameters

#### ◆ Occupational exposure limit values

| Component          | Country/Region   | Limit value - Eight hours |                   | Limit value - Short term |                   |
|--------------------|------------------|---------------------------|-------------------|--------------------------|-------------------|
|                    |                  | ppm                       | mg/m <sup>3</sup> | ppm                      | mg/m <sup>3</sup> |
| Mercury dichloride | Canada - Ontario | -                         | 0.025             | -                        | -                 |
|                    | European Union   | -                         | 0.02              | -                        | -                 |
|                    | USA - ACGIH      | -                         | 0.025(as Hg)      | -                        | -                 |
|                    | Finland          | -                         | 0.02              | -                        | -                 |
|                    | Latvia           | -                         | 0.02              | -                        | -                 |
|                    | Spain            | -                         | 0.02              | -                        | -                 |

### Engineering controls

|   |                                                                                        |
|---|----------------------------------------------------------------------------------------|
| 1 | Ensure adequate ventilation, especially in confined areas.                             |
| 2 | Ensure that eyewash stations and safety showers are close to the workstation location. |
| 3 | Use explosion-proof electrical/ventilating/lighting/equipment.                         |
| 4 | Set up emergency exit and necessary risk-elimination area.                             |

### Personal protection equipment

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General requirement      |      |
| Eye protection           | Must wear appropriate anti-corrosion goggles.                                                                                                                                                                                                                                                                                                                                                                                          |
| Hand protection          | Must wear acid and alkali resistant chemical protective gloves.                                                                                                                                                                                                                                                                                                                                                                        |
| Respiratory protection   | Must wear appropriate personal dust proof gas mask.                                                                                                                                                                                                                                                                                                                                                                                    |
| Skin and body protection | Must wear acid and alkali resistant chemical protective clothing.                                                                                                                                                                                                                                                                                                                                                                      |

## 9 Physical and chemical properties and safety characteristics

### Physical and chemical properties

|                                          |                                                 |
|------------------------------------------|-------------------------------------------------|
| Appearance (physical state, color, etc.) | Colorless to slightly yellow transparent liquid |
| Odor                                     | No information available                        |
| Odor threshold                           | No information available                        |

|                                                    |                                                                                 |
|----------------------------------------------------|---------------------------------------------------------------------------------|
| <b>pH</b>                                          | 4.8~5.8 ( 20°C, 50g/L )                                                         |
| <b>Melting point/freezing point(°C)</b>            | 151                                                                             |
| <b>Initial boiling point and boiling range(°C)</b> | 170                                                                             |
| <b>Flash point(Closed cup,°C)</b>                  | No information available                                                        |
| <b>Evaporation rate</b>                            | No information available                                                        |
| <b>Flammability</b>                                | No information available                                                        |
| <b>Upper/lower explosive limits[%(v/v)]</b>        | Upper limit : No information available ; Lower limit : No information available |
| <b>Vapor pressure</b>                              | 0.015Pa ( 20°C )                                                                |
| <b>Vapor density(Air = 1)</b>                      | No information available                                                        |
| <b>Relative density(Water=1)</b>                   | 1.31 ( 20 °C )                                                                  |
| <b>Solubility</b>                                  | 1000g/L ( 20 °C )                                                               |
| <b>n-octanol/water partition coefficient</b>       | 0.58                                                                            |
| <b>Auto-ignition temperature(°C)</b>               | No information available                                                        |
| <b>Decomposition temperature(°C)</b>               | 170                                                                             |
| <b>Kinematic viscosity</b>                         | No information available                                                        |

## 10 Stability and reactivity

### | Stability and reactivity

|                                           |                                                                                                                         |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>Reactivity</b>                         | Contact with incompatible substances can cause decomposition or other chemical reactions.                               |
| <b>Chemical stability</b>                 | Stable under proper operation and storage conditions.                                                                   |
| <b>Possibility of hazardous reactions</b> | In contact with active metals (alkali metals, Na, Ca etc.) causes a reaction and release hydrogen.                      |
| <b>Conditions to avoid</b>                | Incompatible materials, heat, flame and spark.                                                                          |
| <b>Incompatible materials</b>             | Alkali, sodium, calcium, and other active metal, halogen, metal oxide, nonmetal oxide, acyl halide and metal phosphide. |
| <b>Hazardous decomposition products</b>   | Under normal conditions of storage and use, hazardous decomposition products should not be produced.                    |

## 11 Toxicological information

### | Acute toxicity

| Component                   | LD <sub>50</sub> (oral) | LD <sub>50</sub> (dermal) | LC <sub>50</sub> (inhalation,4h) |
|-----------------------------|-------------------------|---------------------------|----------------------------------|
| <b>Mercury dichloride</b>   | 1mg/kg(Rat)             | 41mg/kg(Rat)              | No information available         |
| <b>Ammonium thiocyanate</b> | 750mg/kg(Rat)           | No information available  | No information available         |

### | Carcinogenicity

| Component                   | List of carcinogens by the IARC Monographs | Report on Carcinogens by NTP | OSHA Carcinogen List |
|-----------------------------|--------------------------------------------|------------------------------|----------------------|
| <b>Ammonium thiocyanate</b> | Not Listed                                 | Not Listed                   | Not Listed           |
| <b>Mercury dichloride</b>   | Category 3                                 | Not Listed                   | Not Listed           |
| <b>Water</b>                | Not Listed                                 | Not Listed                   | Not Listed           |

**| Others**

| Ammonium thiocyanate(Component) |                                                                                     |
|---------------------------------|-------------------------------------------------------------------------------------|
| Skin corrosion/irritation       | Causes skin irritation(Category 2)                                                  |
| Serious eye damage/irritation   | Causes serious eye damage(Category 1)                                               |
| Skin sensitization              | Based on available data, the classification criteria are not met                    |
| Respiratory sensitization       | Based on available data, the classification criteria are not met                    |
| Reproductive toxicity           | Suspected of damaging fertility(Category 2)                                         |
| STOT-repeated exposure          | Causes damage to organs through prolonged or repeated exposure(thyroid)(Category 1) |
| Aspiration hazard               | Based on available data, the classification criteria are not met                    |
| Germ cell mutagenicity          | Suspected of causing genetic defects(Category 2)                                    |

**12 Ecological information****| Acute aquatic toxicity**

| Component            | Fish                                     | Crustaceans                                    | Algae or other aquatic plants             |
|----------------------|------------------------------------------|------------------------------------------------|-------------------------------------------|
| Mercury dichloride   | LC <sub>50</sub> : 0.214mg/L (96h)(Fish) | EC <sub>50</sub> : 0.01mg/L (48h)(Crustaceans) | ErC <sub>50</sub> : 0.14mg/L (96h)(Algae) |
| Ammonium thiocyanate | LC <sub>50</sub> : 65mg/L (96h)(Fish)    | No information available                       | No information available                  |

**| Chronic aquatic toxicity**

|                          |                          |
|--------------------------|--------------------------|
| Chronic aquatic toxicity | No information available |
|--------------------------|--------------------------|

**| Persistence and degradability**

| Component            | Persistence (water/soil) | Persistence (air) |
|----------------------|--------------------------|-------------------|
| Ammonium thiocyanate | Low                      | Low               |

**| Bioaccumulative potential**

| Component            | Bioaccumulative potential | Comments       |
|----------------------|---------------------------|----------------|
| Ammonium thiocyanate | Low                       | Log Kow=0.5829 |

**| Mobility in soil**

| Component            | log Koc | Remark |
|----------------------|---------|--------|
| Ammonium thiocyanate | 0.653   |        |

**13 Disposal considerations****| Disposal considerations**

|                          |                                                                                                                                                        |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste chemicals          | Before disposal should refer to the relevant national and local laws and regulation. Recommend the use of incineration disposal.                       |
| Contaminated packaging   | Containers may still present chemical hazard when empty. Keep away from hot and ignition source of fire. Return to supplier for recycling if possible. |
| Disposal recommendations | Refer to section waste chemicals and contaminated packaging.                                                                                           |

## 14 Transport information

### Label and Mark

|                    |  |
|--------------------|--|
| Transporting Label |  |
|--------------------|--|

### IMDG-CODE

|                                   |                   |
|-----------------------------------|-------------------|
| UN number                         | 1624              |
| UN proper shipping name           | MERCURIC CHLORIDE |
| Transport hazard class            | 6.1               |
| Transport subsidiary hazard class | None              |
| Packing group                     | II                |
| Marine pollutant ( Yes or no )    | Yes               |

### IATA-DGR

|                                   |                   |
|-----------------------------------|-------------------|
| UN number                         | 1624              |
| UN proper shipping name           | MERCURIC CHLORIDE |
| Transport hazard class            | 6.1               |
| Transport subsidiary hazard class | None              |
| Packing group                     | II                |

### UN-ADR

|                                   |                   |
|-----------------------------------|-------------------|
| UN number                         | 1624              |
| UN proper shipping name           | MERCURIC CHLORIDE |
| Transport hazard class            | 6.1               |
| Transport subsidiary hazard class | None              |
| Packing group                     | II                |

### Transport in bulk according to IMO instruments

- ◆ Transport in bulk according to Annex II of MARPOL and the IBC code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

- ◆ Transport in bulk in accordance with MARPOL Annex V and the IMSBC Code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

- ◆ Transport in bulk in accordance with the IGC Code

|  |               |
|--|---------------|
|  | Not Available |
|--|---------------|

### Others

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautions for transport | Transit should be anti-exposure, rain, high temperature. Strictly prohibited shipping or transportation with acids, alkalis, oxidants, food and food additives etc. Transport vehicles should be equipped with the appropriate variety and quantity of fire equipment and emergency equipment leakage during transport. Before transport, should be preceded by checking whether container integrity, sealing. The transport unit must be placarded and marked in accordance with |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

relevant transporting requirements.

## 15 Regulatory information

### International chemical inventory

| Component            | A | B | C | D | E | F | G | H | I | J | K | L | M |
|----------------------|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Ammonium thiocyanate | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Mercury dichloride   | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Water                | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
